

Soft Infant Wristbands

Gentle enough for a newborn's delicate skin

Soft, comfortable wristbands for the smallest patients!

Wristbanding infants is a sensitive issue. While hospitals go to great lengths to properly identify infants, staff members are also concerned with the comfort and durability of the bands. Zebra kept these challenges in mind when creating a complete line of wristbands for infants.

Bar coded wristbands are the foundation for positive patient identification and the prevention of serious medical errors. Zebra thermal printers produce crisp, clear print quality on all wristbands, so bar codes scan quickly and reliably. Zebra offers several soft, comfortable infant wristbands to meet most hospital's needs.

Our new line of soft Z-Band Direct and Z-Band QuickClip™ wristbands feature a:

- Soft nylon material that is perfect for delicate skin
- Adjustable design that fits the smallest patients.
- Flat surface print area to insure ease of scanning
- 2" x 0.75" print area and a 0.5" x 6" band.
- Patent-pending antimicrobial coating that prevents the growth and survival of microorganisms

Our Z-Band Direct wristbands feature a pressure sensitive, adhesive tab closure for quick and easy securement, while our Z-Band QuickClip features a secure clip closure.

Our Z-Band Direct wristbands are available in cartridge form for use with our HC100 printer, as well as rolls for use with our desktop printers. Our Z-Band QuickClip wristbands are available in rolls for use with our desktop printers.

Antimicrobial coating keeps dangerous bacteria off the band

Zebra's patent-pending antimicrobial coating was proven in independent lab tests to eliminate from the band Methicillin-resistant Staphylococcus aureus (MRSA) Type II, Type III, and Type IV.

The bands are additionally protected from:

- *S. aureus*
- *P. aeruginosa*
- *E. coli*

—the three leading causes of hospital infections in the United States.

Bar coded wristbands are the foundation for preventing serious medical errors at the point of care. Zebra's antimicrobial wristbands help extend those powerful benefits by protecting the wristbands from dangerous, infection-causing bacteria.

A white paper of the laboratory testing conducted on our Z-Band antimicrobial-coated wristbands can be found at www.zebra.com/antilab.

Zebra's HC100 Patient I.D. Solution combines the reliable HC100 direct thermal printer with easy-to load cartridges of Z-Band wristbands in adult, pediatric or infant sizes. Pop the wristband cartridge into the HC100 printer and print durable, individual wristbands on demand. The HC100 printer detects the wristband size and automatically calibrates its settings for optimal print quality.
